

## Project Management

*Does your organisation struggle to manage strategic projects that are imperative to deliver, and which will have a significant impact on your organisation's performance and reputation? Have you struggled to get projects delivered on time, within budget and to the required scope and quality standards?*

*Robust project management involving clearly specified tasks and activities, along with the precise delegation of resources with clearly defined roles, is the at the core of effective project management.*

Facilitating the delivery of every client project, StratNovation takes on the challenge by adopting the client's perspective and expectations. Projects that we deliver not only meet client's needs but provide insightful value-added outputs in the delivery process.

StratNovation fulfils the role of a client project manager, whether a project is stand-alone or whether there are multiple projects that need to be delivered. Clients are guided in the project management delivery process by:

- understanding, analysing and synthesising the client brief into a specific set of agreed requirements that need to be delivered;
- developing a comprehensive project charter / plan detailing all aspects of the project, technical design, work breakdown structures [WBS] and all financial and commercial aspects, from inception to managing the implementation of the project;
- selecting skilled, competent project teams to deliver the project, including the contracting out-sourced components of the project;
- monitoring the implementation of the project against time, cost and quality;
- managing client liaison and feedback, including progress reporting;
- determining the project delivery risks and how to mitigate each risk;
- managing different types of project outputs and ensuring that each one impacts performance in a pre-determined manner, including:
  - o reports for decision-making;
  - o implementable outputs (tools and techniques); and
  - o solutions that need to be operationalised.
- ensuring client satisfaction by completing project stage-by-stage sign-off; and
- ensuring a project closure and implementation review, considering output quality, time and cost.

In undertaking project management assignments, StratNovation selects from the best-of-class project management frameworks and technologies to ensure that projects are delivered in the most optimal manner.

## Project Management

After providing a comprehensive, graphically illustrated project close-out report for your organisation, a full-day facilitated workshop will be held with the purpose of:

- ensuring that the project outputs impact the organisation's performance;
- illustrating how the outputs will be implemented, if not undertaken as part of the project and
- seeking evidence on how the client perceived the value delivered during the implementation of the project.

Facilitating end-to-end robust project management entails working to deadlines as well as effective project monitoring and evaluation to meet client requirements.
